RE: Medication Therapy Consultation for Patient "*pt. name.*"

Dear

The purpose of this correspondence is to notify you that your patient _____ has been referred to the Minnesota Visiting Nurse Agency Pharmacy Program by UCare Minnesota.

The Minnesota Visiting Nurse Agency Pharmacy Program provides a PharmD to visit clients in their homes in order to provide a comprehensive Medication Therapy Consultation. The MVNA Consultation includes:

- Interpreting and evaluating prescription, non-prescription and herbal medication products being taken by your patient;
- teaching your patient related to their understanding of their medication regimen;
- advising your patient, where necessary, of therapeutic values, content, hazards, and proper use of medications and devices; and
- providing clinical pharmacy services through direct contact with your patient, and in direct association with and in support of your medical practice.

Following the PharmD visit to your patient, you can expect to receive from MVNA a comprehensive Medication Therapy Consulting report which will include:

- a reconciled medication list;
- recommendations to you, the primary care provider of ideas to improve your patient's medication regimen, if necessary; and
- a note summarizing the PharmD findings and recommendations.

Physicians who have used the MVNA Medication Therapy Consultation service have expressed deep appreciation for the strength it has brought to their medical practice.

If you would prefer that your patient not receive this Medication Therapy Consultation, please inform our intake office as soon as possible by calling 612 – 617 – 4600.

Sincerely,

Lisa Abicht-Swensen, M.H.A.
Chief Operating Officer
