

Care Management Manual Feedback Form

The *Care Management Manual* was developed as a reference guide for UCare policies and procedures relating to the care management of members. The Care Management Manual provides a means of disseminating instructions and guidance to Care Coordinators and Case Managers as they provide these services to our members in different UCare products. We hope that you find this a user friendly guide. Once you have used this manual, we would appreciate any feedback you may have, especially any additions you would recommend.
