The new University of Minnesota Pediatric Dental Clinic, made possible by Delta Dental of Minnesota, offers a new era of pediatric dental care and education in Minnesota.

This state-of-the-art clinic offers the most advanced pediatric dental care in the Upper Midwest. As Minnesota’s largest hospital-based pediatric dental clinic, we care for all children, including well and medically compromised patients and children who need additional care due to physical or developmental disabilities.

Our dentists are faculty and residents of the School of Dentistry’s Advanced Education Program in Pediatric Dentistry. Patients may also receive care from multidisciplinary teams which include dental hygienists and dental specialists.

The clinic’s close proximity to the University of Minnesota Amplatz Children’s Hospital and pediatric specialty clinics encourages collaboration and interprofessional care for children who need it.

About the clinic:
• Provide pediatric oral health care in collaboration with pediatric health care professionals from more than 50 specialty areas.
• Hospital dentistry is available through the University of Minnesota Amplatz Children’s Hospital where comprehensive dental care is delivered under general anesthesia.
• Dental emergencies including injuries to the teeth or mouth, tooth pain and infection are managed here between 8 a.m. and 5 p.m. Monday through Friday. After hours and weekend emergencies are handled in the Emergency Department at the University of Minnesota Amplatz Children’s Hospital.
• Most dental insurance plans accepted, including M.A. and MinnesotaCare.
